

RESULT OF AGRONOMIC TESTS CARRIED OUT WITH VT-TRACTOR TYRES

ERFAHRUNGSBERICHT

The tests carried out over a year with an agricultural engineer show the advantages of low-pressure VT-Tractor tyres in improving the efficiency of work in the fields.

ERFAHRUNGSRÜCKLAUF

Bericht über die festgestellten Vorteile des Reifens VT-TRACTOR

- “7% reduction in fuel consumption when you lower pressure from 1.6 bar to 0.6 bar.”
- “1.8% improvement in efficiency in the field with a lower inflation pressure of 0.6 bar.”
- “17% reduction in soil compaction.”
